Corporate Social Responsibility Statement

We are aware of the influence of our business operations on the environment and on society, and we aim to act in such a way that the natural environment is preserved and remains accessible for future generations. We do this by increasingly integrating sustainability into our business processes, products and services.

To achieve this, we make conscious choices and search for a balance between people, the planet and profit. This is an ongoing process, not a final destination. We continually seek out achievable steps to embed these forms of social responsibility in our business. To help to attain these goals, we have implemented the following measures:

- We actively keep abreast of developments in the field of corporate social responsibility within our profession, and we make an active contribution to the transfer of our knowledge of the issues to our employees and others who wish to enter the profession.

- We inform our guests, employees and suppliers of the steps we take in the field of corporate social responsibility.

- We make transparent agreements with stakeholders on the quality of our products and the ways in which we monitor this quality.

- We identify not only the financial impact, but also the social and environmental impact of our products, and limit any negative impact as far as possible.

- We make a voluntary contribution to social causes through donations, sponsoring and voluntary work.

- We attempt, where possible, to inform our guests about (and facilitate them in) reducing their environmental impact.

- We constantly work on minimising our environmental impact and enhancing the sustainable nature of our business by actively striving to reduce waste flows and our use of gas, water and electricity.

- We constantly work on improving our own purchase process, with a particular focus on goods and services that are sustainable and bear a recognised environmental, sustainability and/or social quality mark.
